Education

SRH University, Hamburg

Oct 2025 – Sep 2027

M.Sc. Applied Data Science & Artificial Intelligence

Specialization: Supply Chain & Logistics Analytics

Relevant Coursework: Machine Learning, Artificial Intelligence, Statistical Modeling, Database Systems

Mandatory Internship as part of the curriculum.

Vedavyasa Degree College, India

Mar 2022 – Jun 2024

B.Sc. Computer Science

Experience

Full Stack Engineer Intern, Karthikeyan Software Solutions Pvt. Ltd. Jan 2023 – Jul 2023

- Developed responsive web applications using HTML, CSS, JavaScript, PHP and MySQL.
- Designed and integrated relational database solutions for efficient data storage and retrieval.
- Collaborated throughout the software development lifecycle including testing and debugging.
- Optimized backend functionality and improved application usability.
- Used Git for version control and feature integration.

Projects

Supermarket Sales Data Pipeline

🔗 Repository

Python, SQL, DuckDB, Streamlit, Pandas

- Built an end-to-end ETL pipeline for supermarket sales data from multiple CSV files.
- Automated data cleaning, transformation, feature engineering and profit calculations.
- Designed a DuckDB warehouse for analytical querying.
- Developed an interactive Streamlit dashboard with KPIs and sales insights.

Cryptocurrency Price Direction Prediction

🔗 Repository

Python, Scikit-Learn, XGBoost, Pandas

- Developed ML classification models using Random Forest and XGBoost.
- Performed preprocessing, feature engineering and leakage prevention.
- Compared models using classification metrics and feature importance analysis.

CareerTrack – Job Application Tracking System

 Repository

Python, Flask, SQLite, HTML, Bootstrap, Docker

- Developed a full-stack job application tracking system using Flask and SQLite.
- Implemented CRUD operations to manage applications and recruitment workflow.
- Built an interactive dashboard showing application status and success metrics.
- Designed responsive interfaces with Bootstrap and Jinja2 templates.
- Containerized the application using Docker.

Technical Skills

- **Programming:** Python, SQL, JavaScript
- **Machine Learning:** Pandas, NumPy, Scikit-Learn, XGBoost
- **Data Engineering:** ETL Pipelines, DuckDB, Streamlit
- **Data Visualization:** Power BI, Tableau, Matplotlib
- **Databases:** MySQL, SQLite, DuckDB
- **Frameworks:** Flask, Bootstrap, Jinja2
- **Enterprise Systems:** SAP MM
- **Tools:** Git, GitHub, Docker, VS Code, Excel
- **Cloud/OS:** AWS (Basics), Linux

Certifications

- Data Analyst with Python – DataCamp
- SQL Certification Track – DataCamp

Languages

English (Professional Working Proficiency), German (A2), Hindi (Professional Working Proficiency), Telugu (Native)
