PROFESSIONAL PROFILE

M.Sc. student in Applied Data Science & Artificial Intelligence at SRH University Hamburg, specializing in Supply Chain Analytics. Develops data pipelines, dashboards and machine-learning models with Python and SQL. Completed hands-on SAP S/4HANA MM procurement training at Technische Hochschule Brandenburg and is now studying inventory management and invoice verification. Interested in using analytics to improve business and supply chain decisions.

TECHNICAL SKILLS

Programming & analysis: Python, SQL, Pandas, NumPy, exploratory data analysis, statistical modeling, data cleaning

Machine learning: scikit-learn, XGBoost, Random Forest, classification, feature engineering, time-series data, model evaluation

Data engineering & databases: ETL pipelines, DuckDB, MySQL, SQLite, MongoDB Atlas, data transformation, relational databases

Business intelligence & visualization: Power BI, Tableau, Streamlit, Plotly, Matplotlib, Excel (PivotTables, XLOOKUP), KPI dashboards

SAP & procurement: SAP S/4HANA MM, SAP Fiori, SAP GUI, Procure-to-Pay (P2P), RFQs, purchase orders, goods receipt, invoice verification

Master data & supply chain: Material/vendor master, purchasing info records, source lists, inventory management (in training), demand forecasting, AnyLogistix

Development & platforms: Flask, REST APIs, Docker, Git, GitHub, HTML/CSS, JavaScript, PHP, Bootstrap, Jinja2, Linux, AWS (basics)

DATA SCIENCE & ANALYTICS PROJECTS

Supermarket Sales Data Pipeline

Data engineering project

Python | SQL | DuckDB | Pandas | Streamlit

- Combined 1,000 supermarket sales transactions with product costs; cleaned and transformed data to calculate revenue and profit measures.
- Used SQL and DuckDB to examine sales patterns; built a Streamlit dashboard for KPIs, profitability and trends.

Cryptocurrency Price Direction Prediction

Machine learning project

Python | scikit-learn | XGBoost | Pandas

- Engineered time-series features and trained Random Forest and XGBoost classifiers to predict price direction.
- Compared model performance using classification metrics and validation designed to reduce data leakage.

CareerTrack - Job Application Tracking System

Software & analytics project

Python | Flask | SQLite | Docker

- Developed a Flask application with SQLite-backed CRUD workflows, application statuses and dashboard metrics.
- Created a responsive interface and packaged the application with Docker for reproducible local deployment.

ADDITIONAL ANALYTICS & SUPPLY CHAIN PROJECTS

Demand Forecasting & Inventory Simulation University project

AnyLogistix | Supply Chain Analytics

- Configured customers, factories, distribution centers and demand inputs to model an end-to-end supply chain.
- Explored how alternative inventory and distribution decisions affect supply chain planning scenarios.

ODI Cricket Analytics Dashboard Data visualization project

Python | MongoDB Atlas | Streamlit | Plotly

- Built a cricket analytics dashboard to explore ODI statistics with interactive visualizations and comparisons.
- Used Python and MongoDB Atlas to organize and explore data, presenting charts with Streamlit and Plotly.

SAP S/4HANA TRAINING | TECHNISCHE HOCHSCHULE BRANDENBURG (ERP4STUDENTS)

SAP MM - Sourcing & Procurement with SAP S/4HANA Summer 2026 | Completed

Practical online university training

- **Master data:** Practiced creating and maintaining material/vendor master records, purchasing info records and source lists in SAP case studies.
- **Procure-to-Pay:** Worked through requisition, RFQ and quotation, purchase order, goods receipt and invoice verification in SAP Fiori and SAP GUI.

SAP MM - Inventory Management & Invoice Verification Winter 2026/27 | In progress

Online university training

- Currently studying SAP inventory management and invoice verification workflows; course is not yet completed.

PROFESSIONAL EXPERIENCE

Full Stack Engineer Intern 01/2023 - 07/2023

Karthikeyan Software Solutions Pvt. Ltd. | India

- Built responsive web components using HTML, CSS, JavaScript and PHP during application development.
- Worked with MySQL data storage and retrieval; supported debugging, testing and Git-based changes.

EDUCATION

M.Sc. Applied Data Science & Artificial Intelligence 10/2025 - 09/2027 (expected)

SRH University, Hamburg, Germany

Specialization: Supply Chain Analytics | Relevant study: Machine Learning, Statistical Modeling, Databases, Demand Forecasting and Inventory Management.

B.Sc. Mathematics, Statistics & Computer Science 2021 - 2024

Vedavyasa Degree College, affiliated with Sri Venkateswara University | India

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

SAP: SAP MM - Sourcing & Procurement with SAP S/4HANA, Technische Hochschule Brandenburg / ERP4Students (completed, 2026).

DataCamp: Data Analyst with Python Track; SQL Certification Track.
