Hamburg, Germany

EDUCATION

SRH University <i>M.Sc. Applied Data Science & Artificial Intelligence (Specialization: Supply Chain Analytics)</i> • Relevant Coursework: Machine Learning, Artificial Intelligence, Statistical Modeling, Database Systems. • Curriculum includes a mandatory internship placement phase.	Hamburg, Germany Oct. 2025 – Sep. 2027
Vedavyasa Degree College <i>B.Sc. Computer Science</i>	India Mar. 2022 – Jun. 2024

EXPERIENCE

Full Stack Engineer Intern <i>Karthikeyan Software Solutions Pvt. Ltd.</i> • Developed responsive web applications using HTML, CSS, JavaScript, PHP, and MySQL. • Designed and integrated structured relational database solutions to optimize data storage and retrieval. • Collaborated across the full software development lifecycle (SDLC) on testing, debugging, and code optimization. • Utilized Git ecosystem workflows for robust version control, code reviews, and seamless feature integration.	Jan. 2023 – Jul. 2023 India
--	--------------------------------

PROJECTS

Supermarket Sales Data Pipeline <i>Python, SQL, DuckDB, Streamlit, Pandas</i> • Engineered an end-to-end ETL pipeline to clean, transform, and aggregate raw multi-format CSV sales datasets. • Optimized a DuckDB analytical data warehouse layer to support low-latency querying and high-volume data storage. • Deployed an interactive Streamlit dashboard to visualize business KPIs, profit metrics, and dynamic sales trends.
Cryptocurrency Price Direction Prediction <i>Python, Scikit-Learn, XGBoost, Pandas</i> • Developed machine learning classification models using Random Forest and XGBoost architectures to predict market movements. • Executed rigorous data preprocessing, time-series feature engineering, and validation to prevent data leakage. • Evaluated iterative model performance using robust classification metrics and feature importance analyses.
Career Track: Job Application Tracking System <i>Python, Flask, SQLite, Docker, Bootstrap</i> • Built a full-stack tracking application utilizing a Flask backend API and SQLite database to manage recruitment workflows. • Designed responsive, clean interfaces using Bootstrap components and modular Jinja2 template rendering. • Containerized the complete application infrastructure with Docker to guarantee seamless, environment-agnostic deployment.

CERTIFICATIONS

SAP MM Certification – Brandenburg University
Data Analyst with Python Track – DataCamp
SQL Certification Track – DataCamp

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, PHP, HTML/CSS
Machine Learning & Analytics: Pandas, NumPy, Scikit-Learn, XGBoost, Statistical Modeling
Data Engineering & Enterprise Systems: ETL Pipelines, DuckDB, Streamlit, SAP MM, Power BI, Tableau, Matplotlib
Databases & Frameworks: MySQL, SQLite, Flask, Bootstrap, Jinja2
DevOps & Platforms: Git, GitHub, Docker, VS Code, AWS (Basics), Linux
Languages: English (Professional), German (A2), Telugu (Native), Hindi (Professional)
